

# New Fastwall

Fastwall is an innovative weather resistant way to clad, infill, or build a wall with real brick slips at incredible speed and efficiency. Fastwall can be supplied in virtually any brick type to replicate traditional brickwork perfectly.

## Where to use Fastwall

The system is ideal for either exterior or interior applications. It has been successfully used on a wide range of projects including; shop fit-outs where Fastwall's ready availability (typically 7 to 10 days) and rapid construction was highly prized to minimise the loss of trading, to the refurbishment of pedestrian underpasses where it's high strength and durability was an essential element.

Use Fastwall for:

- gable staggers
- over cladding of existing walls
- lightweight framing

## Fastwall performance

Fastwall is a precision engineered composite of 20mm thick brick slips bonded to a patented backing and featuring a unique interlocking system.

For example, the standard Taban panel covers 0.66 m<sup>2</sup> and weighs just 24kg. Lightweight makes Fastwall easy to install on site.

In addition to on site advice, a complete scheduling and take-off service is available, as well as numbered panel kits with

corresponding site drawings to ensure that even the most complex installation is hassle free!

Fastwall holds full third party performance accreditation by CERAM, the ceramic industry test centre.

# Fastwall components

Taban standard panel 5 x 8

Dorben panel 4 x 8

Gurban panel 3 x 8

Jiran panel 2 x 8

Niken panel 1 x 8

Left & right stopend/starter

30° external & internal corner panels

45° external & internal corner panels

60° external & internal corner panels

Gable cut Taban panel

90° external return

# Fastwall... at a glance installation guide

Fastwall is quick and easy to install. Each panel is individually designed to ensure a perfect fit.

Fastwall panels are applied to an appropriate substrate.

The panels are aligned with the existing brickwork and secured through the fixing points provided.

Specially designed panel overlaps ensure a durable and weatherproof finish.

Fastwall panels are precisely designed for each project to ensure a perfect finish.

Once the panels have been installed, the joints can be pointed to match existing brickwork.
